Safety Guidelines:

Please read the instruction manual carefully before using the camera for the first time.

Please check the latest version manual on our website.

1. It's a high-precision product, do not drop or crash it.
2. Do not expose the camera to strong magnetic objects, such as magnets or electrical motors. Avoid exposing the product to strong radio waves. Strong magnetic fields may cause the products breakdown or image/audio damage.
3. Never leave the products exposed to high temperatures and direct sunlight.
4. In case of overheating, smoke, or unpleasant smell, unplug your device immediately to prevent fire hazard.
5. Keep the product out of children's reach. Power cable may cause children accidental suffocation or electric shock.
6. Keep the device in cool, dry and dust-free places.
7. Please do not throw the product or its battery to the garbage, find a specific recycling place for it.

Features :

LED indicator:

resolutions	LED color
4K	Red
Others	Green
Flashing	Recording
Fast Flashing	Wifi ON

Wires:

Red: 7-26V DC input +

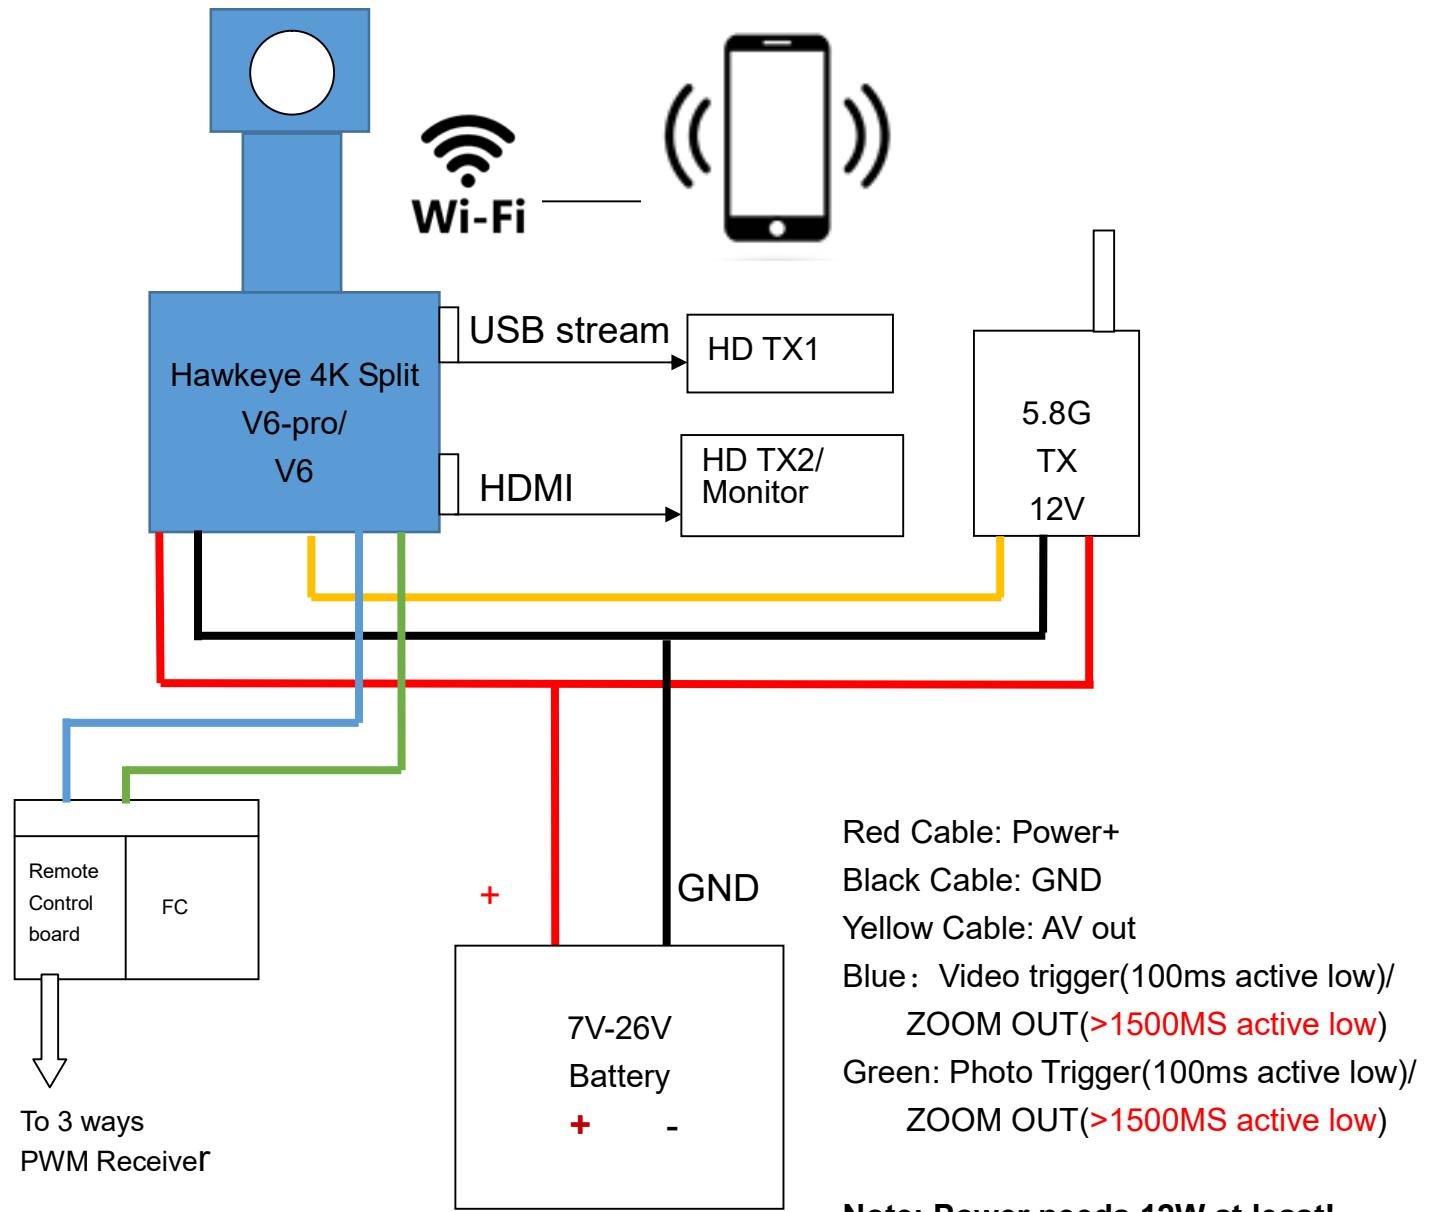

Black: GND

Yellow: Video Out

Blue: Video/ZOOM IN trigger

Green: Photo/ZOOM OUT trigger

Note: Never connect video/trigger port to power+!!! Or they will be destroyed!

1. PC CAM resolutions: 4K, 1080P.
2. USB streaming (MAX 1080P), AV output, HDMI, video recording at the same time..
3. USB streaming is not supported at photo mode, only in video mode.

Performance and Specifications:

	Resolutions	4K 60/30FPS/ 4K HDR 30FPS 2.5K 16:9 60FPS/ 1080P100/ 60/30FPS/
	AV output	PAL
	Micro SD card	U3 Sandisk recommend
	SD card supported	8-256G FAT32
	Main board Size	38 ×38 MM 30.5×30.5 two layer
	Camera Size	19×19mm
	Net Weight	35g
	File format	*.MP4/H.265/H.264
	Lens	M16,F/2.8 , 7G2P glasses
	Angle	Diagonal 160 degrees
	Voltage	7-26V
	Current	1A

Buttons:

Name	Functions	Description
Power/ OK Button	Power ON/OFF; Start/Stop Recording	Press Once to power on; Press once to start/stop recording after power on.
Wifi Button	Toggle between (Note: if camera connect to PC, it will turn into Masstorage mode. The operation won't work. Use a 5V 2A USB power to supply)	Press and hold for 2 seconds to turn on/off Wifi .

OSD key board:

Up button: Zoom in

Left: Menu settings

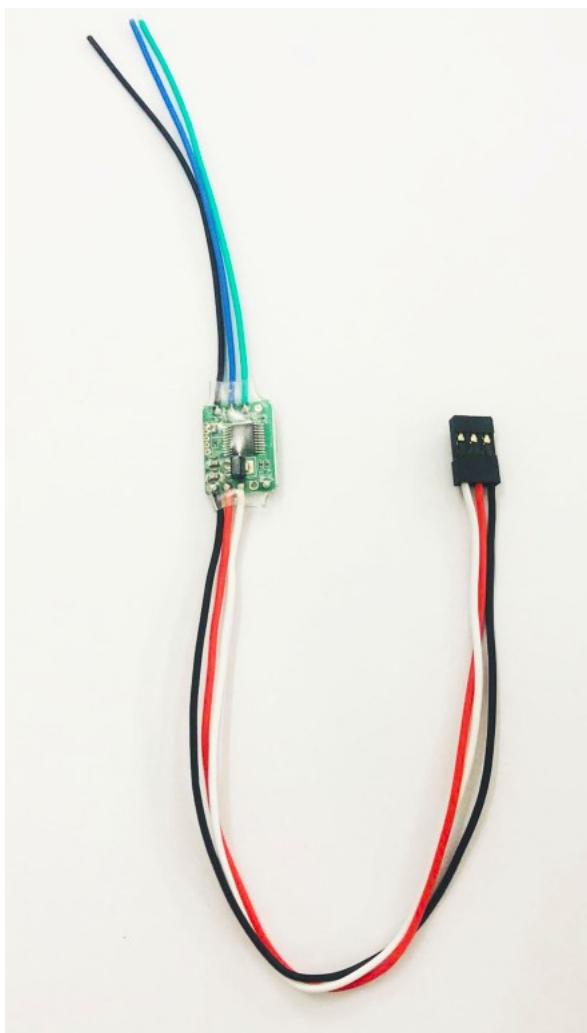

Double click: system menu

Right: Mode switch

Enter: OK / Record button

Down: Zoom out

Remote control cable (Optional) :

1. DuPont head, connected to one channel PWM receiver, White (PWM signal), Red (5V), Black (Ground).
2. 3P soldering wire, connected to the camera trigger wires, black (Ground), blue (video trigger), green (photo trigger).
3. Blue: Video trigger(100ms active low)/ ZOOM OUT(>1500MS active low)
4. Green: Photo Trigger(100ms active low)/ ZOOM OUT(>1500MS active low)

Video Settings:

Resolution: 4K60/30fps、4K HDR 30FPS,2.5K 16:9 60fps, 1080p 100/60fps, 1080p 30fps.

Loop recording: Off、1、3、5、10 minutes. When the SD card is full, video will be auto loop recording. When the SD card is full, video will be auto loop recording. The oldest file will be deleted first.

ISO: Auto、100、200、400、800、1600、3200. The term was carried over from film, when the ISO rating was known as the “film speed” and “ASA.” Having a standard of sensitivity is important, as it allows you to shoot the same ISO on different cameras and trust that the exposure value will be equal. Lower ISO, darker image, less noise.

Record Audio: Off、On.

Date Stamp: off、On. Set the date time stamps on the video.

EIS: Off、Rocksteay, Horizontal. Gyro Image stabilization(in future). Rocksteay: the video will be saved as stabilized video. Horizontal: the video will lock horizontal at certain degrees. Gyroflow(in future): you can use gyroflow.exe to stable the video on computer or smart phone.

Time-lapse record: Off、1、3、5、10、30sec、1Minute、5M、10M、30M、1Hour.
Note: Time-lapse is a video recording mode that captures video at a very low frame rate: around one to two frames per second, although this depends on the length of the recording. When played back, time-lapse video is almost the opposite of slow motion. Higher value for shorter video. There's no voice in this mode.

Loop recording: Off、1、3、5、10minutes. When the SD card is full, video will be auto loop recording. When the SD card is full, video will be auto loop recording. The oldest file will be deleted first.

WDR: Off, Low, Medium, High. WDR effect will be On/Off. **Note: When this function is turned on, the image will not become dark even toward the sun. The image would not looks so clear if this function is ON sometimes. As a FPV cam, this function should be turned ON.**

Exposure: +2.0、+5/3、+4/3、+1.0、+2/3、+1/3、0、-1/3、-2/3、-1.0、-4/3、-5/3、-2.0. Note: Higher value for brighter image. If you want brighter image, set this value higher. If the image is over exposure, set the value smaller.

Auto Recording: Off, On. **Note:** The camera will turn on and record automatically without pressing button. When you stop recording, you need to press the record button. When the power is suddenly cut off or the stop recording button is not pressed, the file will be damaged. You need to use the keyboard to enter the playback mode. When you play back the damaged file, the file will be repaired automatically.

Image rotation: Off, On. Turn the image upside down.

Codec: H.254、H.265.H.265 has better compression efficiency. Perhaps some players can't play the files. We recommend using **VLC** player.

Electronic shutter: Fix the shutter speed. Auto, 1/60, 1/120, 1/240, 1/480, 1/960, 1/1200, 1/1440, 1/1920, 1/3840, 1/7680.

Photo Settings:

Resolution: 50M、20M、16M、12M、10M、8M、5M.

Self Timer: 2、5、10 sec.

Time lapse photo: 2、5、10 sec.

Long exposure: Off、0.5、1、2、5、10.Using a long-duration shutter speed to sharply capture the stationary elements of images while blurring, smearing, or obscuring the moving elements. Long-exposure photography captures one element that conventional photography does not: an extended period of time.

Note: If you turn on long exposure during the day time, it may cause the image be overexposed.

Burst photo: Single, Burst 3.

Quality: Fine, Normal, Economy.

Sharpness: Strong、Normal、Soft.

White balance: Auto, Daylight, Couldy,Tungsten,Fluorescent.

Quick Review: Off、2、5 sec.

Date Stamp: Off、Date、Date&time. Set the day time on the image

ISO:Auto、100、200、400、800、1600、3200. The term was carried over from film, when the ISO rating was known as the “film speed” and “ASA.” Having a standard of sensitivity is important, as it allows you to shoot the same ISO on different cameras and trust that the exposure value will be equal. Lower ISO, darker image, less noise.

Exposure: +2.0、+5/3、+4/3、+1.0、+2/3、+1/3、0、-1/3、-2/3、-1.0、-4/3、-5/3、-2.0.

WDR: Off, On

Metering: Average、Center-weighted、Spot.

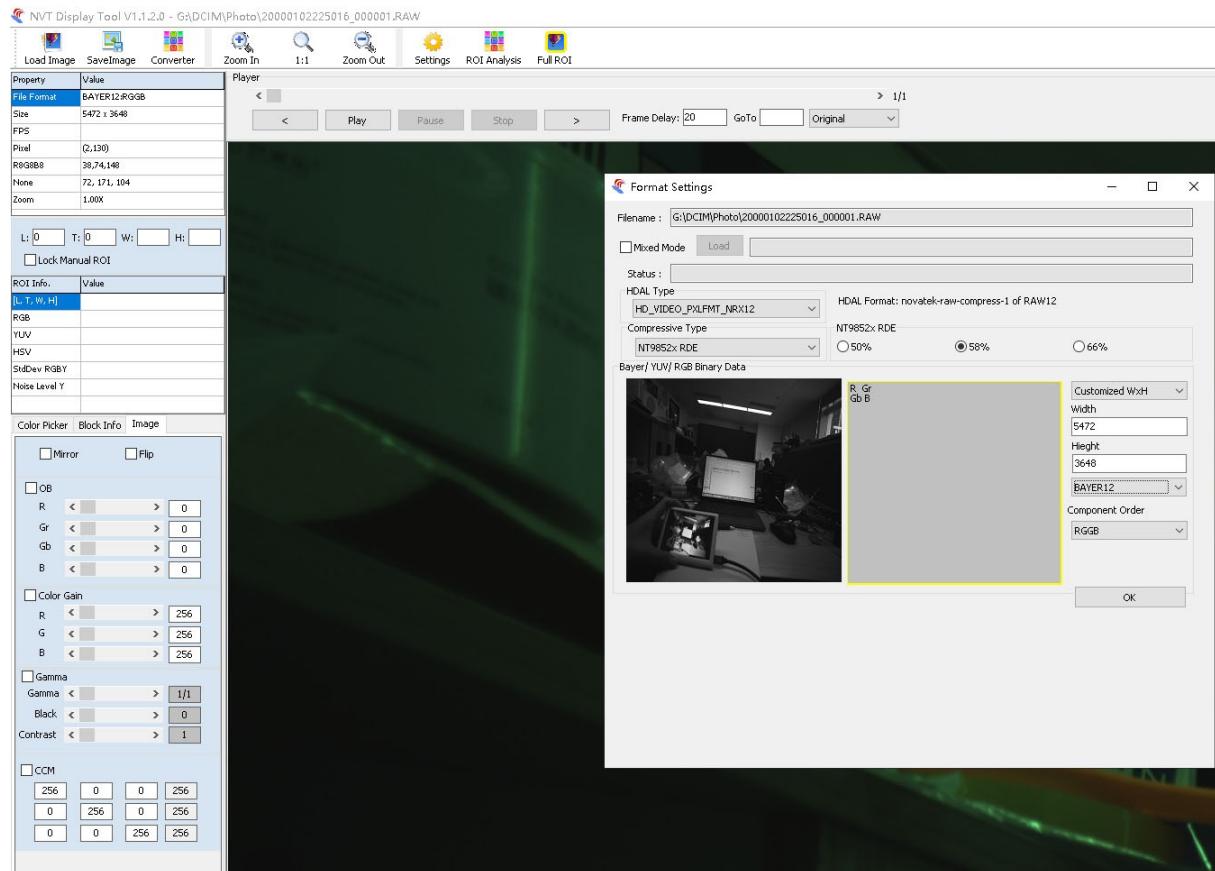

PhotoRaw: JPG, JPG+RAW. Raw photo.

Raw software download for WIN10:

<https://drive.google.com/file/d/1KyhVH0qbVML1EGt2A2eQjrAdxxHowgey/view?usp=sharing>

Settings:

Size: 3840*2160; Type: HD_VIDEO_PXLFMT_NRX12

System Settings:

Date time setting. Set daytime.

Auto power off: Off、1、2、3、5、10minutes. The camera will turn off when there's no operation.

Beep sound: Off、On。Set the beep sound on/off.

Language: Muti languages.

Frequency: 50、60HZ. Light frequency indoor. **When the video flickers indoor,**

change this setting.

USB: Massstorage, PC CAM, USB stream.

NOTE:

- 1. PC CAM resolutions: 4K, 1080P.**
- 2. USB streaming (MAX 1080P), AV output, HDMI, video recording at the same time..**
- 3. USB streaming is not supported at photo mode, only in video mode.**

OSD Mode: Off, On. OSD on TV output. OSD on TV output. To disable the OSD, turn this Off.

Format: Format the SD card. **Note: format the SD card at the first time, or the camera can't recognize the SD card. Please format to FAT32 or exFAT.**

Default settings. if you have any question, you can set to default settings.

Version. Version number. Check its the newest firmware on www.CNfpv.com.

Triggers:

The trigger pins need to be connected to the trigger control cable. Scan to watch.

Note: Don't connect the trigger pins to any power. If you want to control it by a MCU, connect it to a 3.3V GPIO through a 1K resistance.

Record videos:

Please insert SD card, then press Power/OK button once to record. Please use U3 speed SD card at least(8-256G). Format the SD card in the camera at the first time(FAT32/exFAT).

Transferring Files:

1. Connect the camera to a computer via USB cable, and then turn on the camera.
When connection to computer, the camera can't record video.
2. Double click "My Computer" and locate "Removable Disk". Enter "Removable Disk" and you will find all photo and video files in the folder.

Wifi LED indicator:

Hold WiFi button for 2 seconds, ALL LED alternately flashing

APP control the camera:

Sear "OKJ" on the ios.

Google Play:

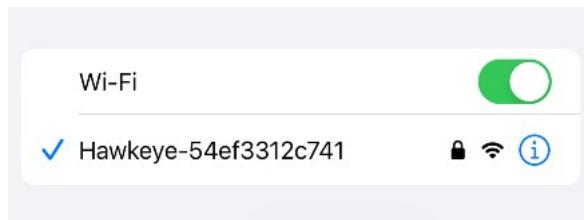

Double click to turn on the camera Wi-Fi (When the camera is ON) ,LED are flashing alternative.

Search "Hawkeye-xxxx" in Wi-Fi with the smart phone and connect it.

Default password: 12345678

← Double Click

After connecting the camera, run OKJ APP and then connect the camera.

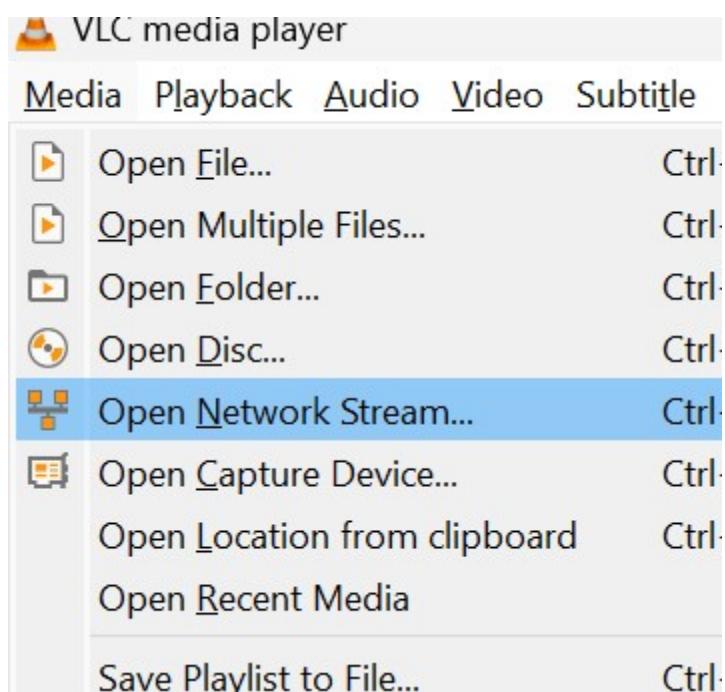

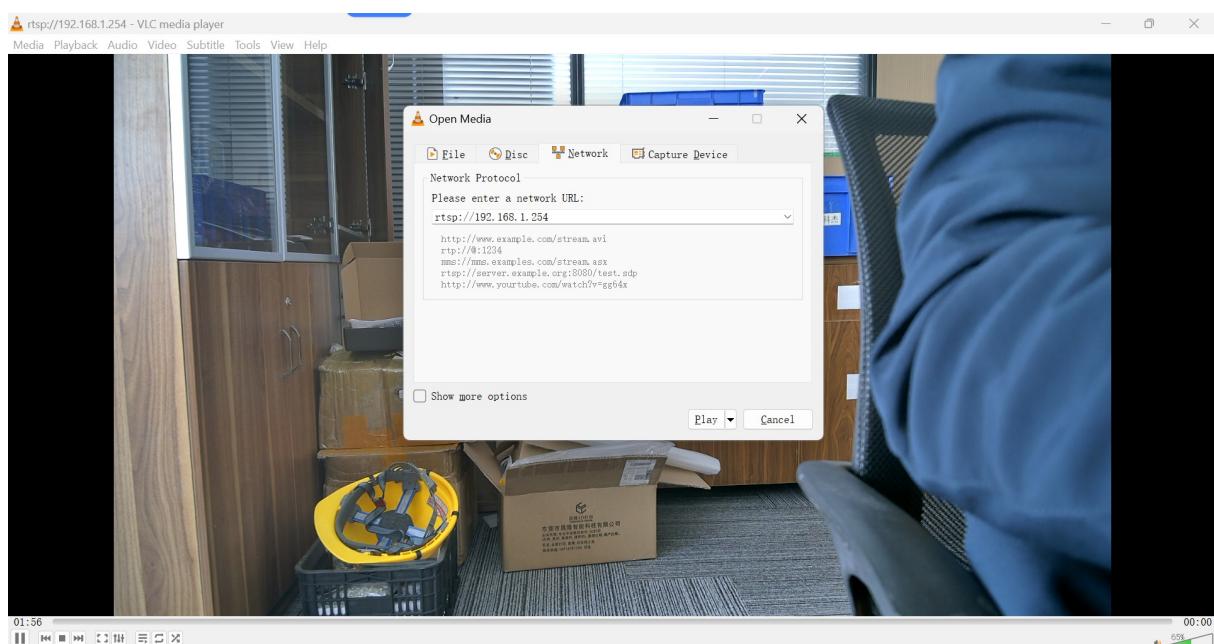

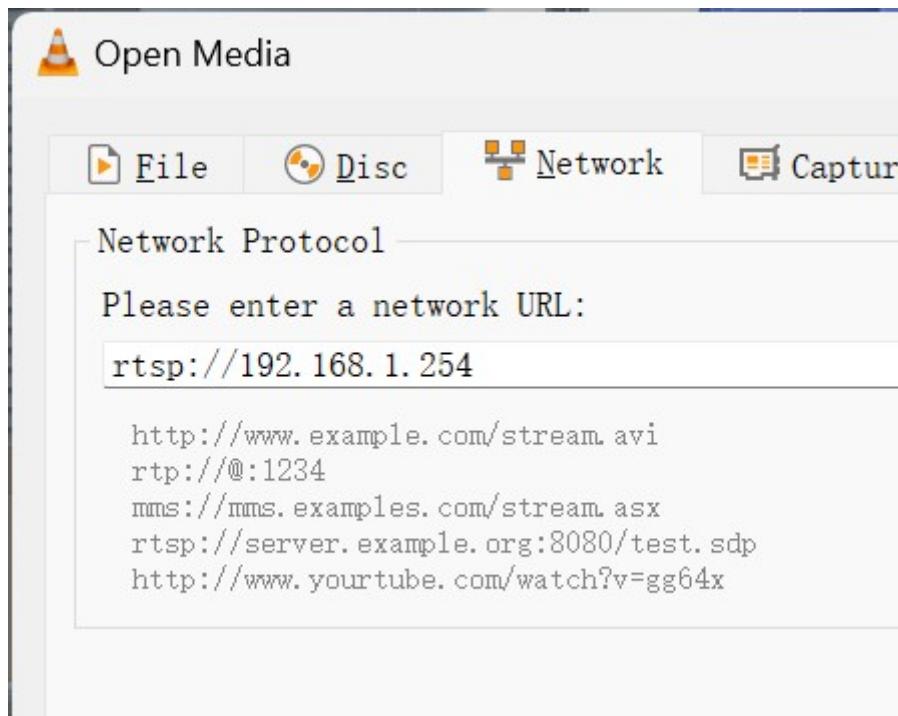

Connect camera

WiFi video streaming & commands:

Start VLC of cellphone or notebook.

2. Input URL rtsp://192.168.1.254
3. User can modify VLC cache time to reduce lag.
4. Make sure camera in movie mode (default is movie mode)

PC CAM:

You can set USB mode or PC CAM in the menu.
USB mode the camera can record video.

Please watch:

<https://youtube.com/shorts/iGPOdA0fMCg?feature=share>

Use Potplayer to open PC CAM.

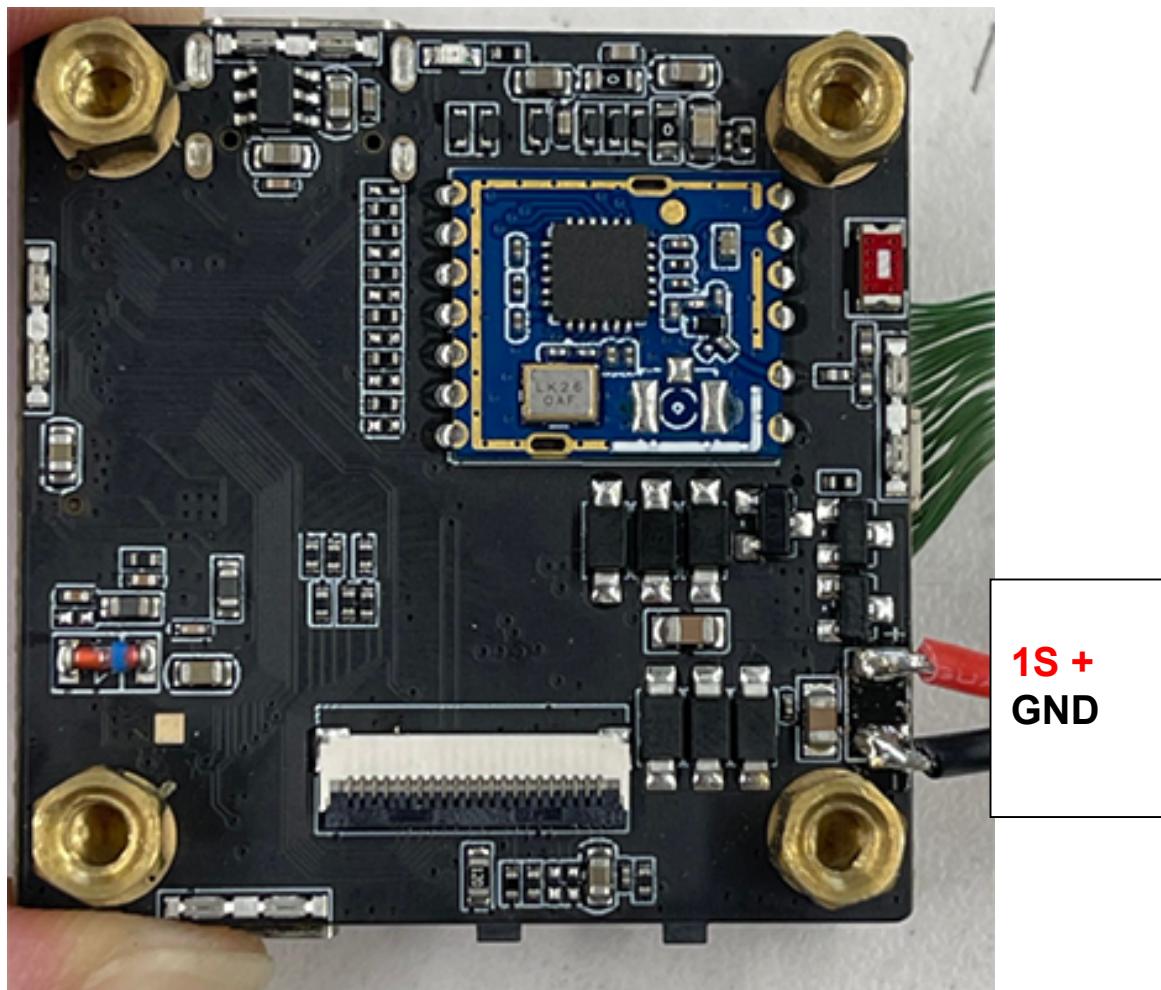

<https://potplayer.tv/>

Update Firmware:

- 1.Delete all the files and folders in the SD card(suggest:8G/16G).
- 2.Download the bin firmware to SD card .
- 3.Insert the SD card into the camera.
- 4.Power on the camera and it will update firmware automatically.
- 5.When updating, the LED will flash.
- 6.When the update process is finished, the LED will stop flashing.
- 7.The camera will reboot again.
- 8.Please check on www.CNfpv.com for new firmwareupdates.

1S battery solder points:

Take the shell off and you will see:

Gyroflow iOS and Android, PC(updating):

Please search “gyroflow: on app store for google play(1.56).

How to use Gyroflow :

IOS:

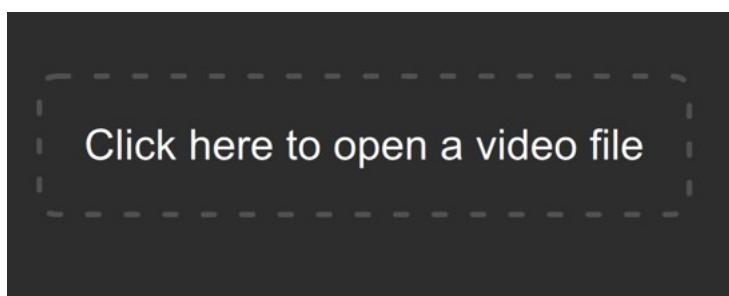

<https://youtu.be/NalAbzdivl0?si=Ji2aoBxGAELgyFMN>

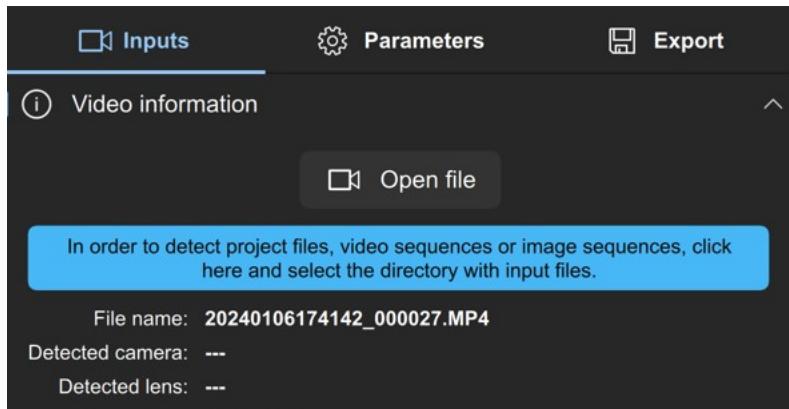

1. Use sd card reader to ready the video and gyro data on the sd card, make sure they are on the same directory. (4K 50 can not be stabled, cause no gyro data in this resolution)

⚠ 20240311114534_202420.MP4 **Video,**
📄 20240311114534_202420.csv **Gyro file**

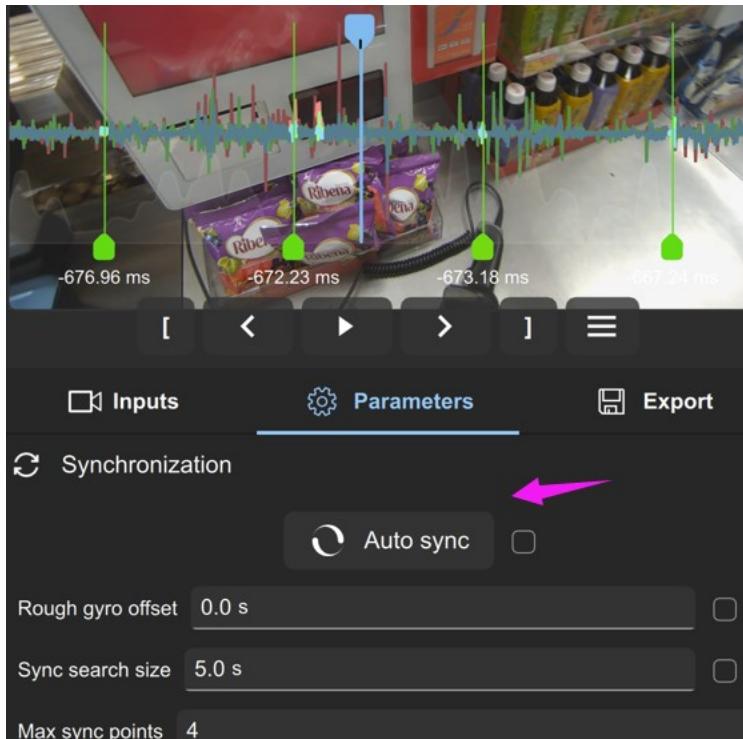

2. Select a video file in the sd card directory.

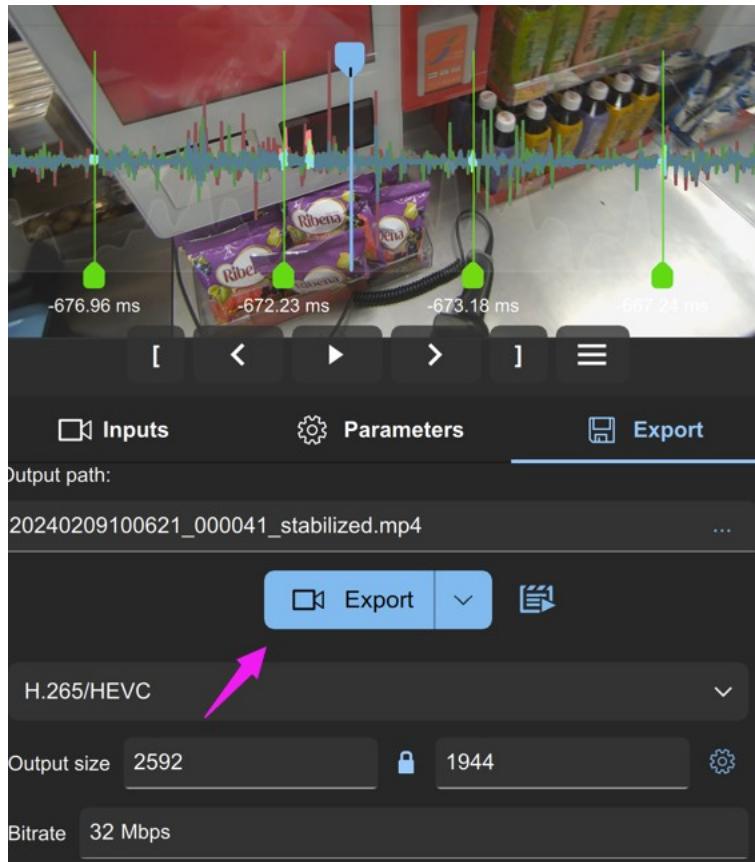

3. Click on the blue font to select the file directory for access authorization.

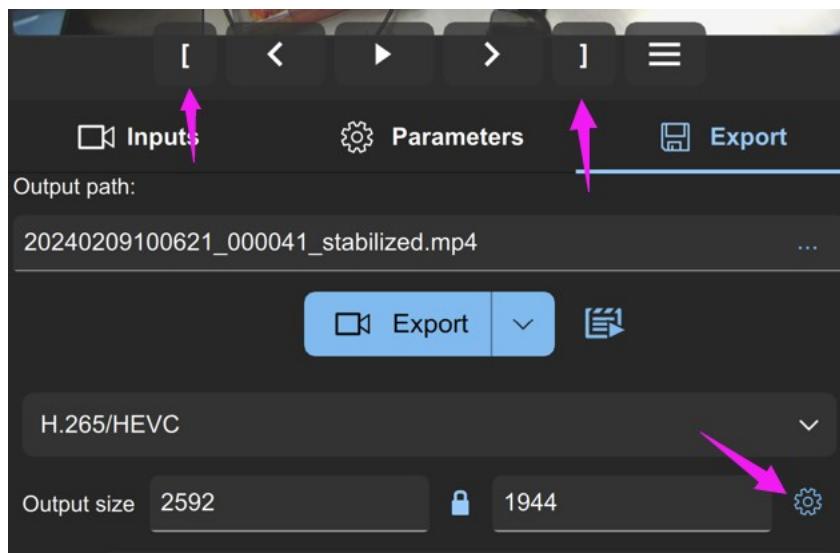

4. Click auto sync to sync the video and gyro data.

5. Export video

6. You can select a video clip or change resolutions to reduce the rendering time.

Android:

<https://youtu.be/F7fNt5FCvkQ?si=YDwFWvUEyHh5NCuf>

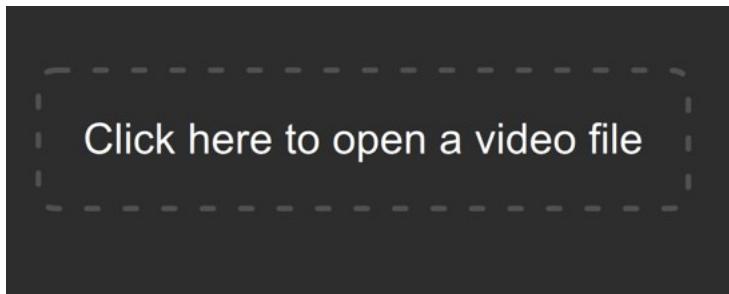

**Use sd card reader to ready the video and gyro data on the sd card,
make sure they are on the same directory. (4K 50 can not be stabled, cause
no gyro data in this resolution)**

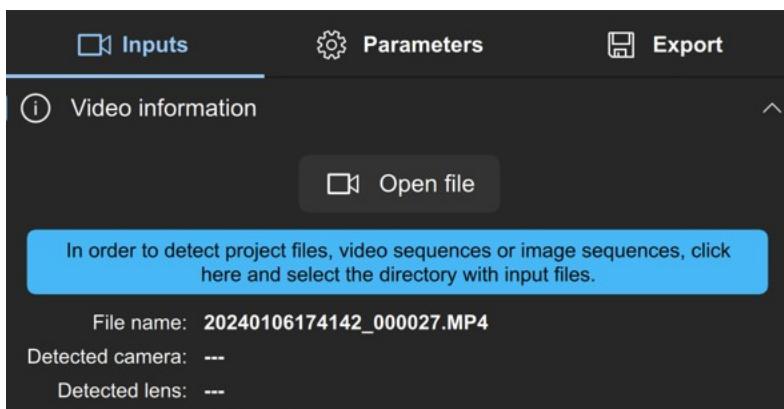

1.

- ⚠ 20240311114534_202420.MP4 [Video](#),
- 📄 20240311114534_202420.csv [Gyro file](#)

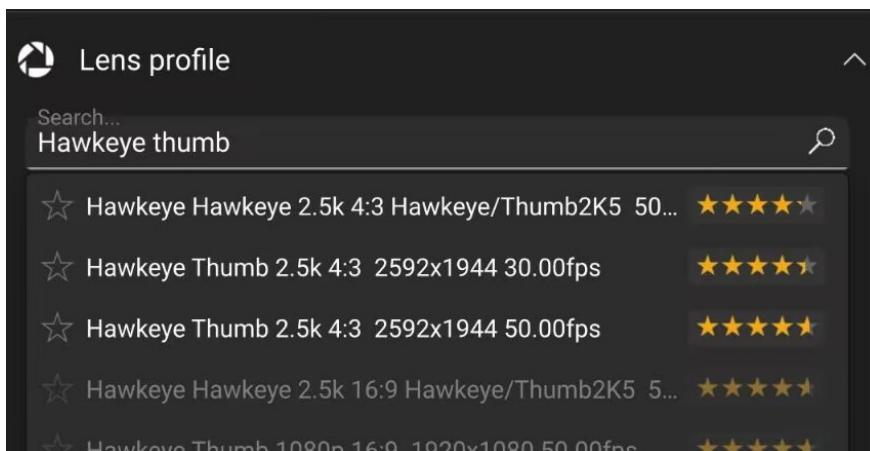

2. Select a video file in the sd card directory.

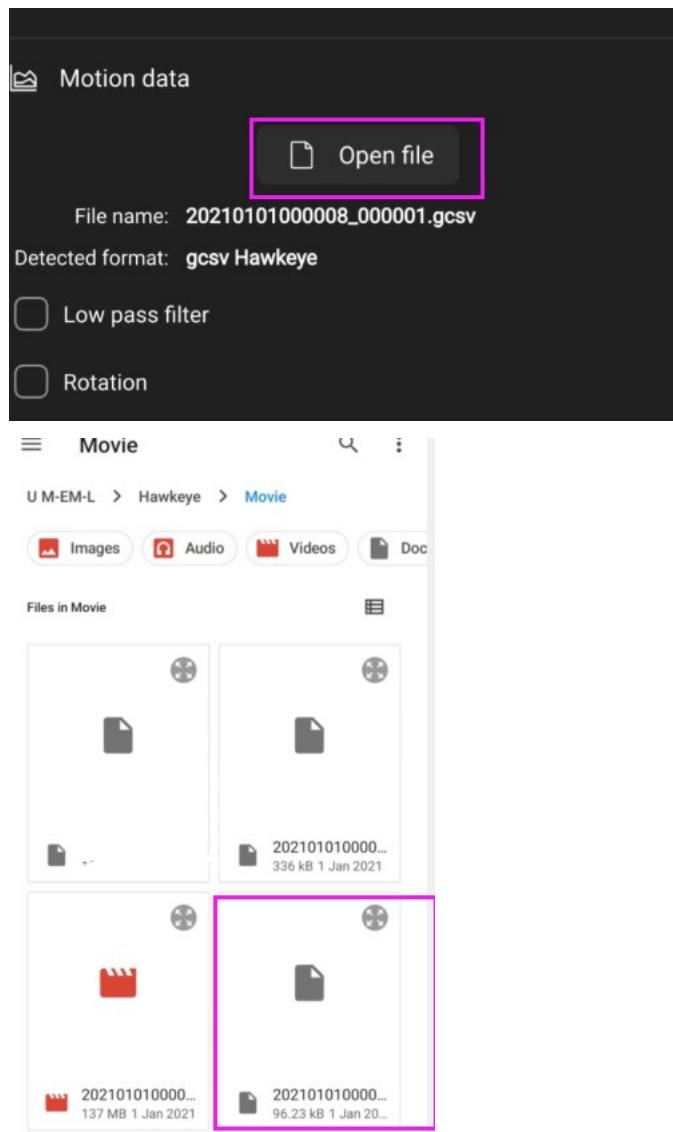

3. Click on the blue font to select the file directory for access authorization.

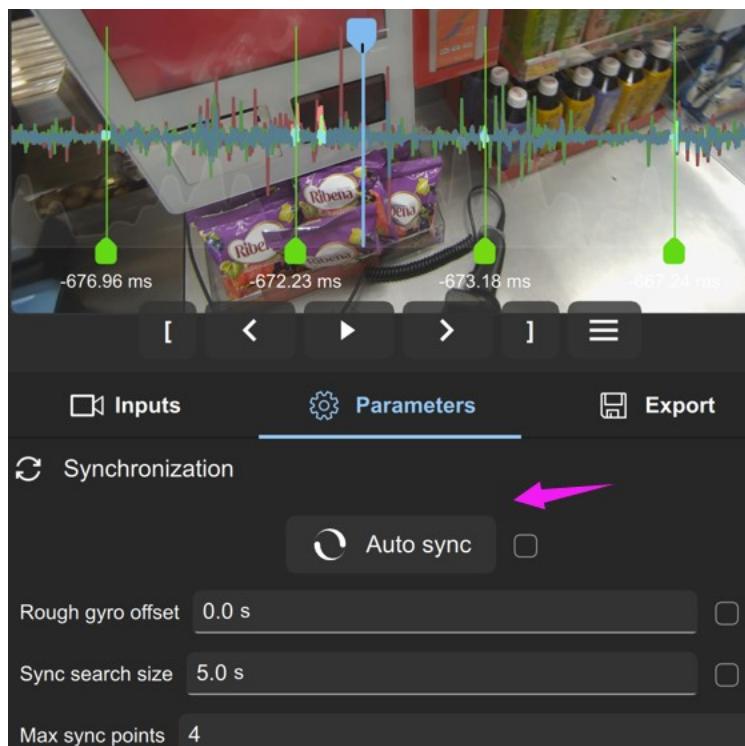

4. Input “hawkeye thumb” to select lens profile(match the resolution). (1.55 version no need this step)

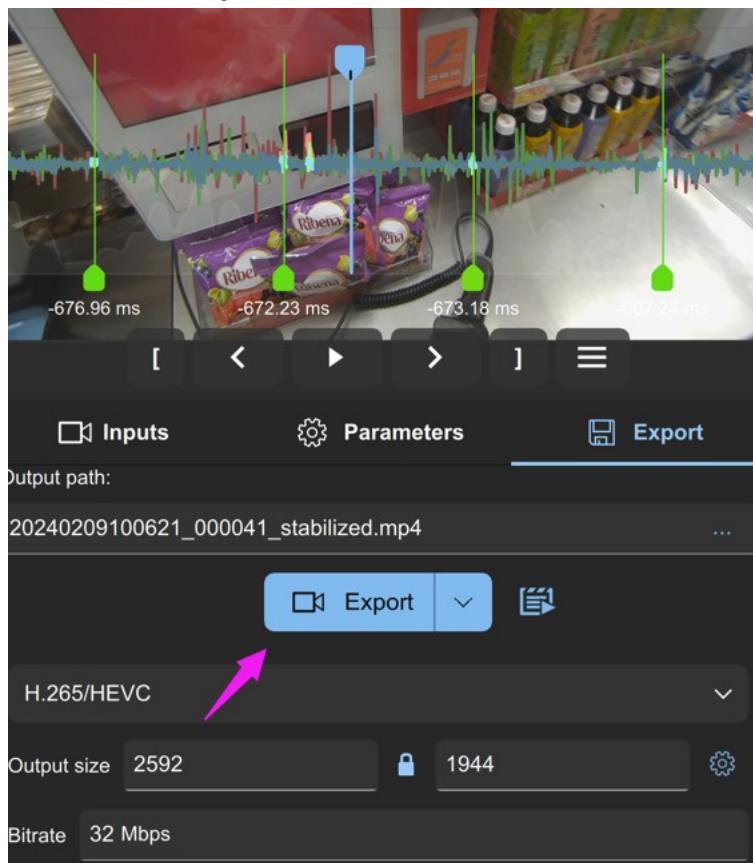

5. Load the Motion data (1.55 version no need this step):

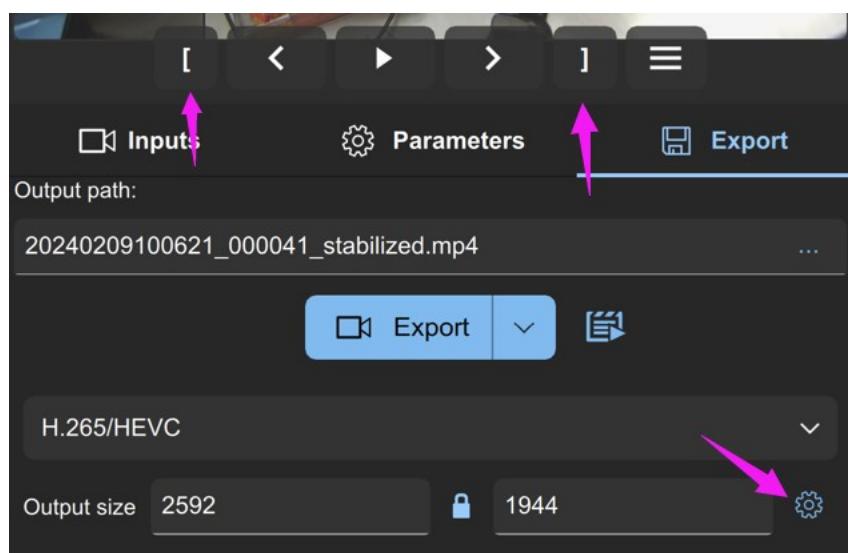

6. Click “auto sync” .

7. When finished, Export video

8. You can select a video clip or change resolutions to reduce the rendering time.

PC :

Software downloads (For WIN 10, 11):

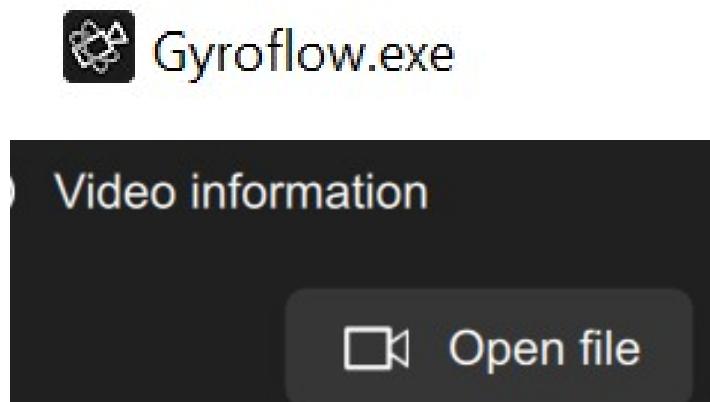

<https://drive.google.com/file/d/1b9hHcAquPv38hZttc9Xcz6gURHscVj-k/view>

The video and the gyro files are placed in the same directly and the file names are the same. **(4K 50 cannot be stabled, cause no gyro data in this resolution)**

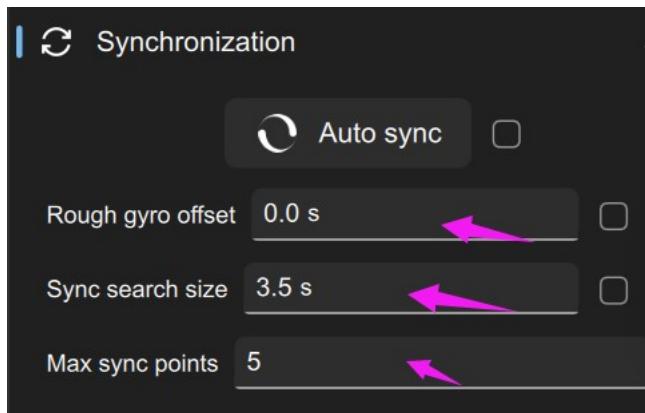

1.

⚠ 20240311114534_202420.MP4 **Video**,
📄 20240311114534_202420.csv **Gyro file**

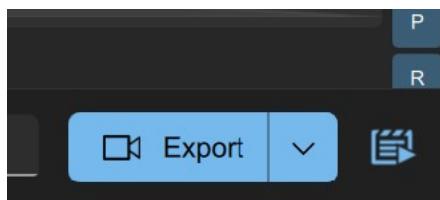

2. Double click to run gyroflow.exe and drop the video file in to the software.

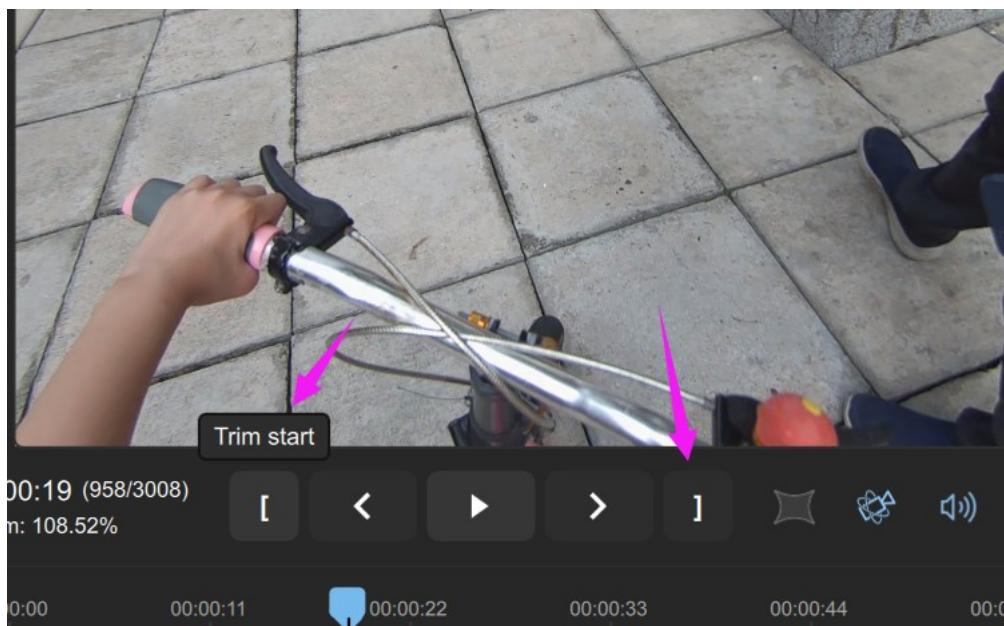

2. Sync search size: **3.5**, max sync points: **5**, then Click “Auto sync” and wait.

3. When the sync process is finished, export video.

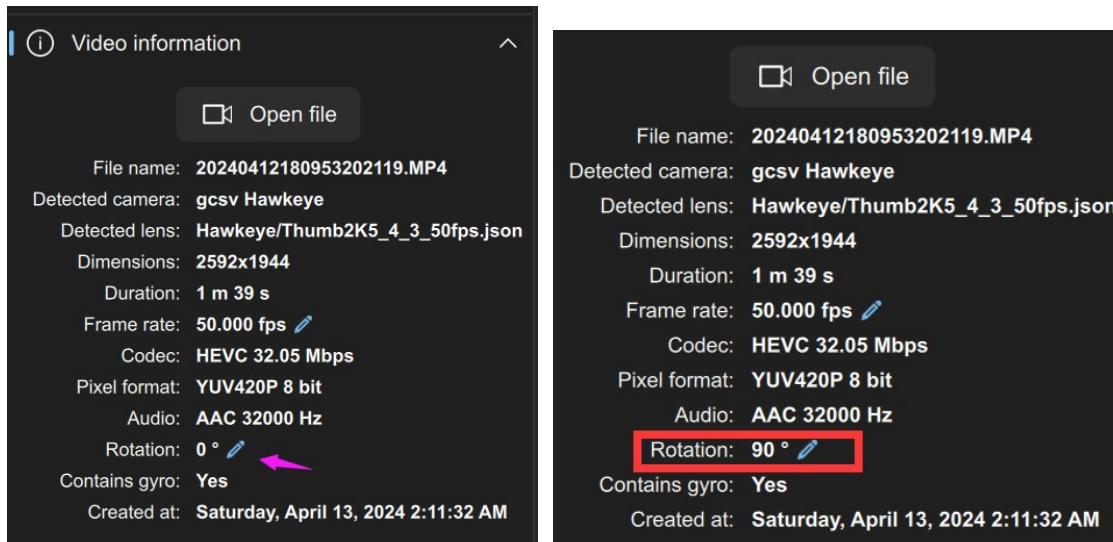

4. For saving time ,you can select a video click to output.

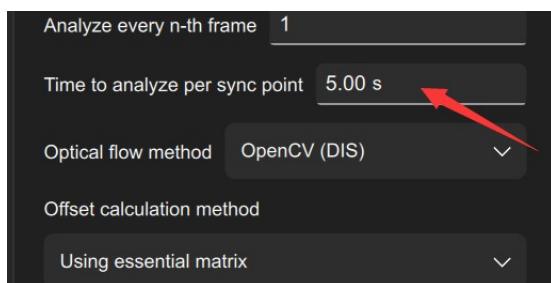

Portrait video:

When camera play in portrait, input 90 degrees in “rotation” in gyroflow:

Notes for Gyroflow :

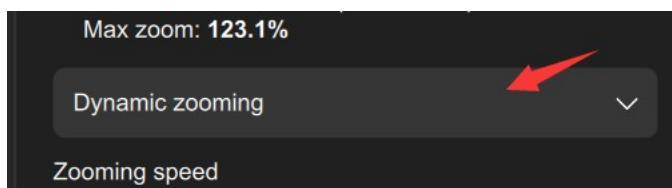

1. Sync time change to 3-5 second:

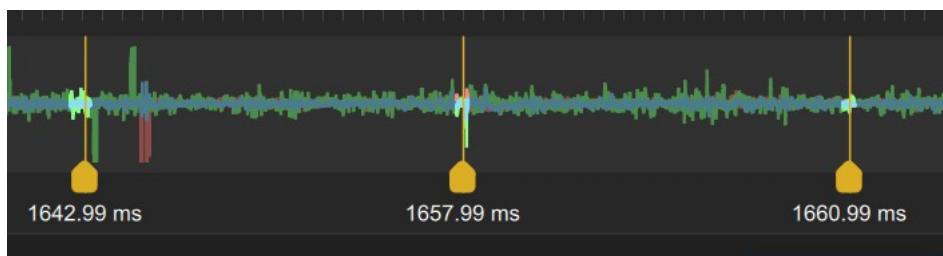

2. Use rs-sync:

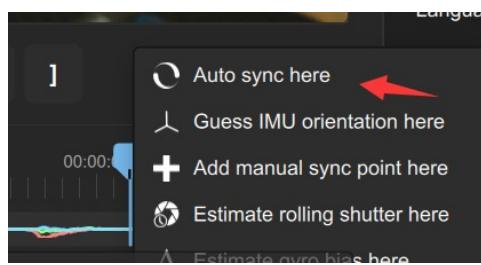

3. (4K 50 can not be stabled, cause no gyro data in this resolution)

4. Select Dynamic zooming, then there will be no black side.

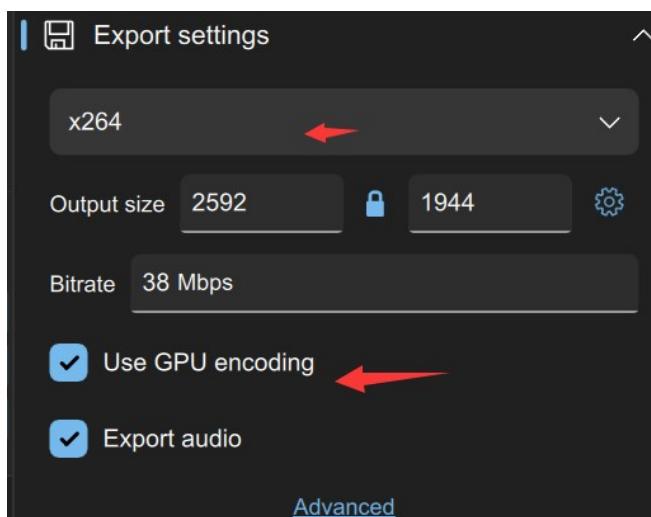

5. Sync points should be similar number, if its too different, delete it and add a sync point on other point(right click on the mouse).

6. If can't export video , turn GPU off, change to H.264.

7. Software require Win 10,11. If can't open the software, install the VC pack:
VC_redist.x64.exe .

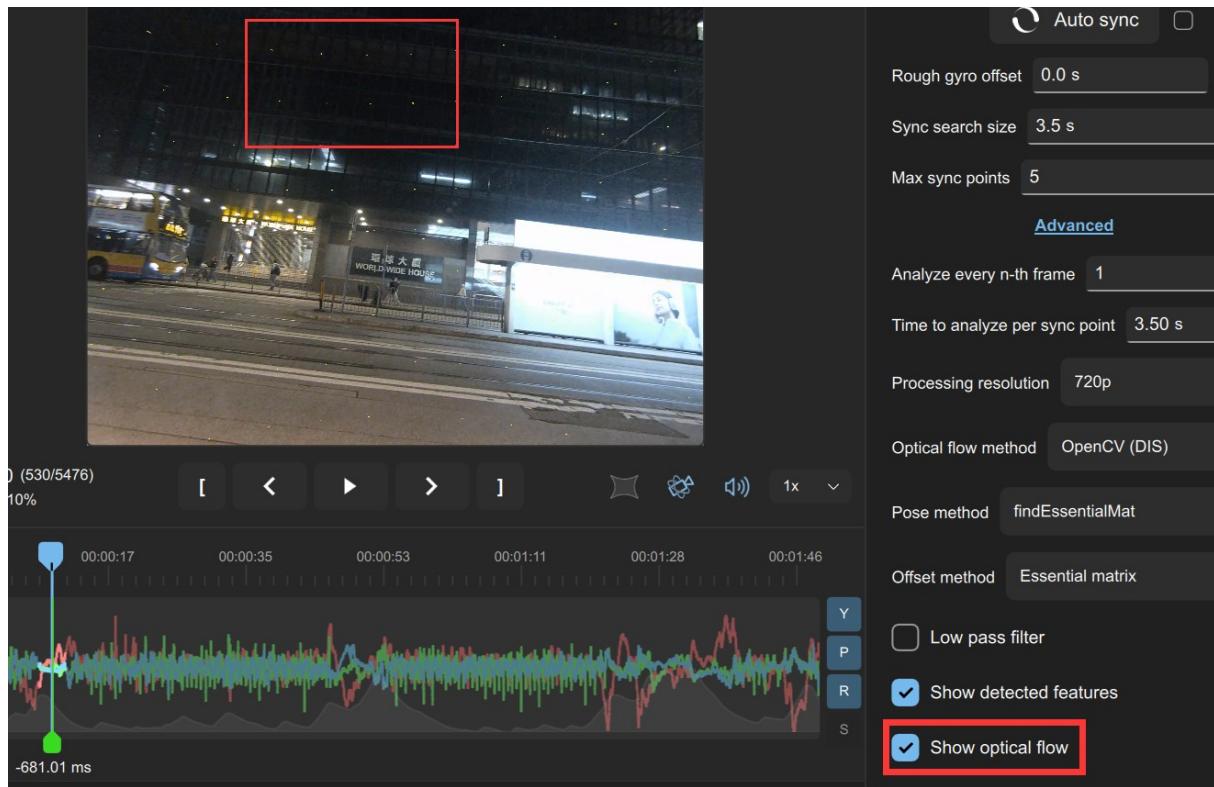

Download link : https://aka.ms/vs/17/release/vc_redist.x64.exe

8. If still can't open, you can install VC:

9. <https://visualstudio.microsoft.com/zh-hans/downloads/?cid=learn-onpage-download-cta>

10. The light dot is optical flow, you could turn it off.

If you don't know how to setup the software, just download our preset software:

<https://drive.google.com/file/d/1b9hHcAquPv38hZttc9Xcz6gURHscVj-k/view>

FCC STATEMENT:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE:

Check on www.CNfpv.com for new firmware/Manual updates.
